ROULETTEIQ

Analytics & Session Performance Report

Report Detail	Value
Report generated	02 November 2026, 21:29
Source file	roulette-results.csv
Total records analyzed	28
Valid numbered outcomes	25
Sessions represented	3

Purpose: summarize recorded roulette outcomes, session activity, and basic data quality using a CSV export from RouletteIQ.

Interpretation note: this report describes historical records. It does not predict future roulette outcomes.

1. Executive Summary

Metric	Value
Total records	28
Valid numbered outcomes	25
Missing results	3
Invalid numbered outcomes	0
Exact duplicate rows	0

Data-quality observations

• The export contains 28 records.

• 3 records have no numeric Result value. These may include color-only outcomes; verify them against the original application records.

• 0 non-missing Result values fall outside the valid integer range from 0 to 36.

• 0 exact duplicate rows were found.

2. Number Frequency

Valid numbered outcomes included in this table: 25.

Number	Observed Count
0	3
1	1
2	1
3	0
4	0
5	0
6	0
7	0
8	0
9	0
10	0
11	1
12	0
13	0
14	0
15	1
16	2
17	2
18	1
19	0
20	5
21	0
22	0
23	1
24	1
25	0
26	1
27	2
28	0

Number	Observed Count
29	1
30	1
31	1
32	0
33	0
34	0
35	0
36	0

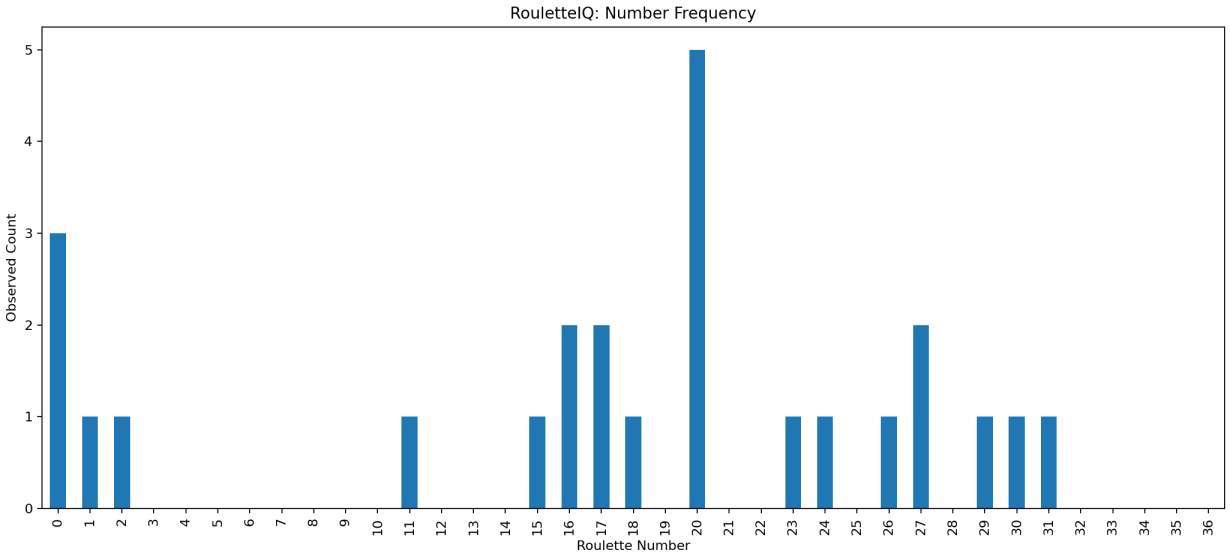

Most frequent observed numbers

Number	Observed Count
20	5
0	3
16	2
17	2
27	2

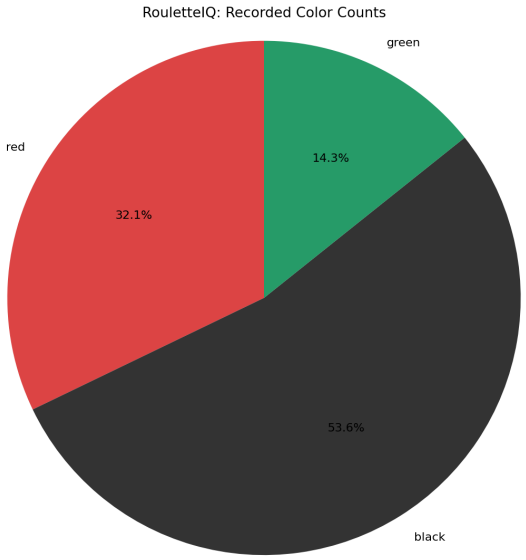

Observed frequency is descriptive, not predictive. In a fair European roulette wheel, each number has probability 1/37 per spin, independently of previous outcomes.

3. Visual Analysis

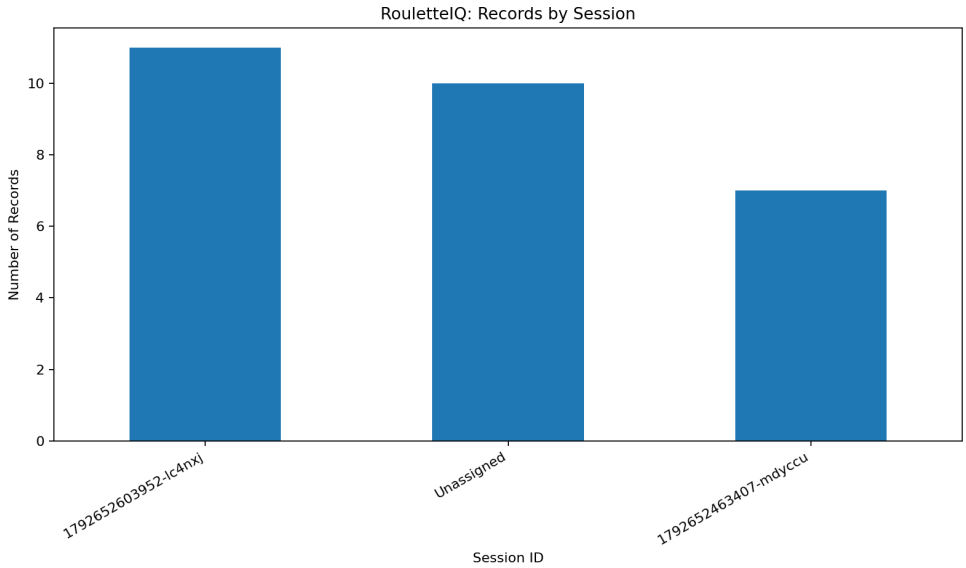

3.1 Number Frequency

3.2 Recorded Color Distribution

3.3 Session Comparison

4. Outcome Categories

Recorded color counts

Color	Count
black	15
red	9
green	4

Recorded parity counts

Parity	Count
Even	12
Odd	10
Neither	3
Unknown	3

5. Session Analysis

Session ID	Records	Valid	Missing
1792652463407-mdyccu	7	7	0
1792652603952-lc4nxj	11	11	0
Unassigned	10	7	3

Reporting period

Earliest timestamp (UTC): 2026-10-21 19:17:10.306000+00:00
Latest timestamp (UTC): 2026-10-24 15:08:09.980000+00:00

Limitations

This report summarizes only the records in the supplied CSV. It does not establish causation, guarantee data completeness, or forecast future spins. Confirm missing-result records and session assignments against RouletteIQ before using the report for operational decisions.
